LIKE A SCIENTIST

Rediscovering Science

Activity: You're a scientist! Scientists are curious about the world around them and ask questions to try to find out the answers. Go outside, find a rock, plant, hole, or any object. If you can't go outside, find something inside.

Write down three questions about your object.

- 1.
- 2.
- 3.

Draw yourself doing the scientific investigation to answer your questions. Be sure to include your outfit and the tools you would use.

Thank you
