# USING YOUR 5 SENSES

---

## Rediscovering Science

**Activity:** Engage your five sense to explore water. Follow the directions of each activity below.

**Touch:** Use your hands to feel the stages of water: solid, liquid, and gas. For gas, think about a steamy shower. Write one word to describe how it feels.

**SOLID**

**LIQUID**

**GAS**

\_\_\_\_\_

**Smell:** Go outside to smell something that needs water to survive. Where does it get it's water from? \_\_\_\_\_

**Taste:** Compare the taste of cold water and hot water. Where in nature does your drinking water come from? \_\_\_\_\_

**Hear:** Fill up 3 identical glass jars or cups with different amounts of water. Tap on the jars with a spoon. Color the picture with the amount of water in each cup in order of their pitch.

Lowest pitch → Highest pitch

**See:** Wash your hands, brush your teeth, or do some other activity in your home with water. What's in the water that needs to be removed by a wastewater treatment plant like LOTT? \_\_\_\_\_
